- HackRussia 2016
- BonchHack 2017

## LANGUAGES

Russian

English

German

## VISA FYI:

Earliest start date depends on visa processing time.

## SUMMARY

I have a strong background in leading teams, specializing in frontend technologies such as Vue.js, JavaScript, TypeScript, (S)CSS, and HTML, among others. My experience spans various industries, including B2B, B2C, and Web3.

Throughout my career, I've overseen the launch of significant features, guided development teams, provided mentorship to fellow developers, and effectively managed projects.

I am seeking a software developer role with a primary focus on frontend development. I am adaptable when it comes to technologies and am eager to work on challenging projects. My expertise lies in TypeScript and contemporary frontend frameworks.

## WORK EXPERIENCE

### Senior Fullstack Developer (Contract)

Aug 2022 - Aug 2023

Chainstack, A Web3 Infrastructure Paas Startup

#### Results:

- Implemented 4 new big user-oriented features
- Made 80% of the old codebase more readable
- Hired 3 developers and successfully onboarded them within 2 weeks
- 80% older modules were refactored to improve performance and maintainability

### Senior Developer, Development Team Lead

Sep 2019 - Apr 2022

Kms Lighthouse, Subsidiary Of Aman

#### Responsibilities:

- Creating new features, migrating the project to new technologies, optimizing and refactoring code.
- Leading a crossfunctional team of developers, managing projects, introducing new processes

#### Results:

- 8 new modules were developed and released by me
- 2 of my teammates became managers after our career growth sessions
- 4 new processes were introduced to improve the team's and whole company's performance
- Hired and onboarded 12 developers
- Migrated 70% of older modules to newer technologies
- Laid a foundation for new Self-Service software featuring SSR, Vue3, TypeScript, Autotesting and Semantic HTML

### Frontend Developer

Dec 2018 - Jul 2019

Grotem

#### Responsibilities:

- Migrating to Angular 2+ from Angular.js
- Participating in an international effort at Virto Commerce

#### Results:

- Successfully migrated "The Box" application to brand new Angular framework, making the build of the new project 100% faster than before
- Created new feature for map navigation using Google Maps and Yandex Maps SDKs

### Software Developer (Contract)

Oct 2017 - Oct 2018

Siis Ltd.

#### Results:

- Created a metrics watcher for some hardware setups (24 mining rigs), a website for a local brewery, landing page for local bank and a dashboard for it's client page.
